Exchange Components Conditions

For engines and components sold as exchange, a surcharge (core charge) applies if outright sale, or if the old unit is returned in an unserviceable condition.

The surcharge is fully refundable upon return and inspection at our works provided that:

The old unit is the same as the unit purchased

The unit is drained of fluids and returned on the base provided

Castings are crack free and capable of remanufacture

The unit must not have impact or frost damage

The unit must not suffer from severe corrosion

In the case of an incorrect or damaged unit being exchanged, a reduced amount will be returned. Where doubt occurs as to the suitability of an old unit for exchange, please contact ACR Ltd for advice. In some cases engines with damaged cylinder heads or crankshafts will not incur surcharge.
